Director's Notes

The Mai of 1998 turned out to be a near picture perfect weekend for all the festivities in Stoughton. Although a little on the warm side for the run, it made for easy going for the walk, volunteers, medical staff and spectators.

The Mai of 1998 also said good-bye to Bill Kohrs, who missed running in the Mai for the first time. We still have three Streakers in the pack to carry on. We hope to have Dick Voigt, Paul Croissant, and Peter Senzig joining us this year for the 27th.

We have received several negative comments from runners this year in regards to walkers who do not walk either two abreast, or who use the middle of the road for their lane. We realize that it is only a few participants who are causing these problems, but also feel some action needed to be taken. Please note that the starting time for the walk will be moved up 1/2 hour to 7:00 a.m. We feel by moving the starting time up sooner, it will relieve the congestion on CTH "B", Sandhill Road, and Schneider Road, and enable both runners and walkers to meet on roads with less vehicle traffic.

Many calls were also received prior to the 1998 walk concerning the desires of some participants to start early, have someone bike with them, or to bring along their dog. Please, for the safety of yourself and others along the course, we ask that all participants, both walk and run, start at the official time without a pet or escort.

That said, fill out the entry form, send it in, put on your training shoes, and get ready for May 15th, 1999.

Medical Self-Care for Beginning Runners

Training and Preparation: You should be able to run at least 10 miles at 10-12 minutes per mile pace to finish this race. If you eat before the race, eat a light breakfast at least 3 hours before starting time. Drink about 8 oz. of fluid one hour before. Start warming up (stretching and jogging) about 30 minutes before the run.

CAPITOL SQUARE

Temperature is a critical factor. Significant heat injury may occur at all temperatures, but particularly above 60° F, wear only light athletic clothing (shorts, t-shirt or tank top). As the temperature increases above 60° F, your pace should be reduced. For example, at 80° F, beginning runners should run at least 1 minute per mile slower.

Fluid Replacement is essential to keep up with sweat losses. The average size male (140 – 160 lbs) may lose 1.5 to 2.0 liters (quarts) of sweat per hour. Drink 6 – 8 oz. of fluid at each station. Stop to drink. Even at this rate you may only replace 50% of sweat loss.

Problems during the run may include muscle cramps, joint pains, blisters and fatigue. Heat symptoms are most dangerous – they are headache, dizziness, disorientation, nausea, decrease in sweat rate, and pale, cold skin. Do not attempt to “run through” these symptoms. Stop, walk or rest and ask for help.

After Running. At the finish, you may experience a period of dizziness or faintness due to a fall in blood pressure. This may be prevented if you keep moving, but if symptoms persist, lie down, raise your legs and call for help.

Chronic Medical Problems. If you have medical problems such as asthma, diabetes, hypertension, or other cardiovascular problems, check with your physician before entering. Wear a “Medic Alert” tag and I. D. during the race.

Remember – Running is Fun. But it can also be stressful. Listen to your body. Walk when you are tired. There is always another race.
