Director's Notes

Run

The first year of being race director went very well for me. As I think back on the race I am very grateful that Paul Selbo left me such a well oiled machine. Every aspect of this race has been well thought out and planned for by Mr. Selbo and the hundreds of volunteers who work the race year in and out. So when road construction was going on at both the start and finish of the run this year, I was free to deal with that. Knowing that the hundreds of little details that make the run happen were being taken care of by people I trusted.

I want to thank everyone who helped out this year, and especially Paul Selbo for all he has done for this race.

We're looking forward to seeing you again next year. The entry forms are included in this booklet, fill it out, send it in, and start training for Syttende Mai 2001.

Walk

This past Syttende Mai Walk featured great weather and a new rolling start. The rolling start allowed walkers to start early if they chose to do so.

Safety is our primary concern and this year we remind walkers to please walk no more than two abreast. The municipalities along the way have stated this as a key safety issue. We will depend on our enthusiastic and dedicated walkers to comply with this request.

Please join us again for this year's walk. Bring a friend and enjoy the festivities afterwards.

Thanks,
Steve Swenson

Medical Self-Care for Beginning Runners

Training and Preparation: You should be able to run at least 10 miles at 10-12 minutes per mile pace to finish this race. If you eat before the race, eat a light breakfast at least 3 hours before starting time. Drink about 8 oz. of fluid one hour before. Start warming up (stretching and jogging) about 30 minutes before the run.

Temperature is a critical factor. Significant heat injury may occur at all temperatures, but particularly above 60° F, wear only light athletic clothing (shorts, t-shirt or tank top). As the temperature increases above 60° F, your pace should be reduced. For example, at 80° F, beginning runners should run at least 1 minute per mile slower.

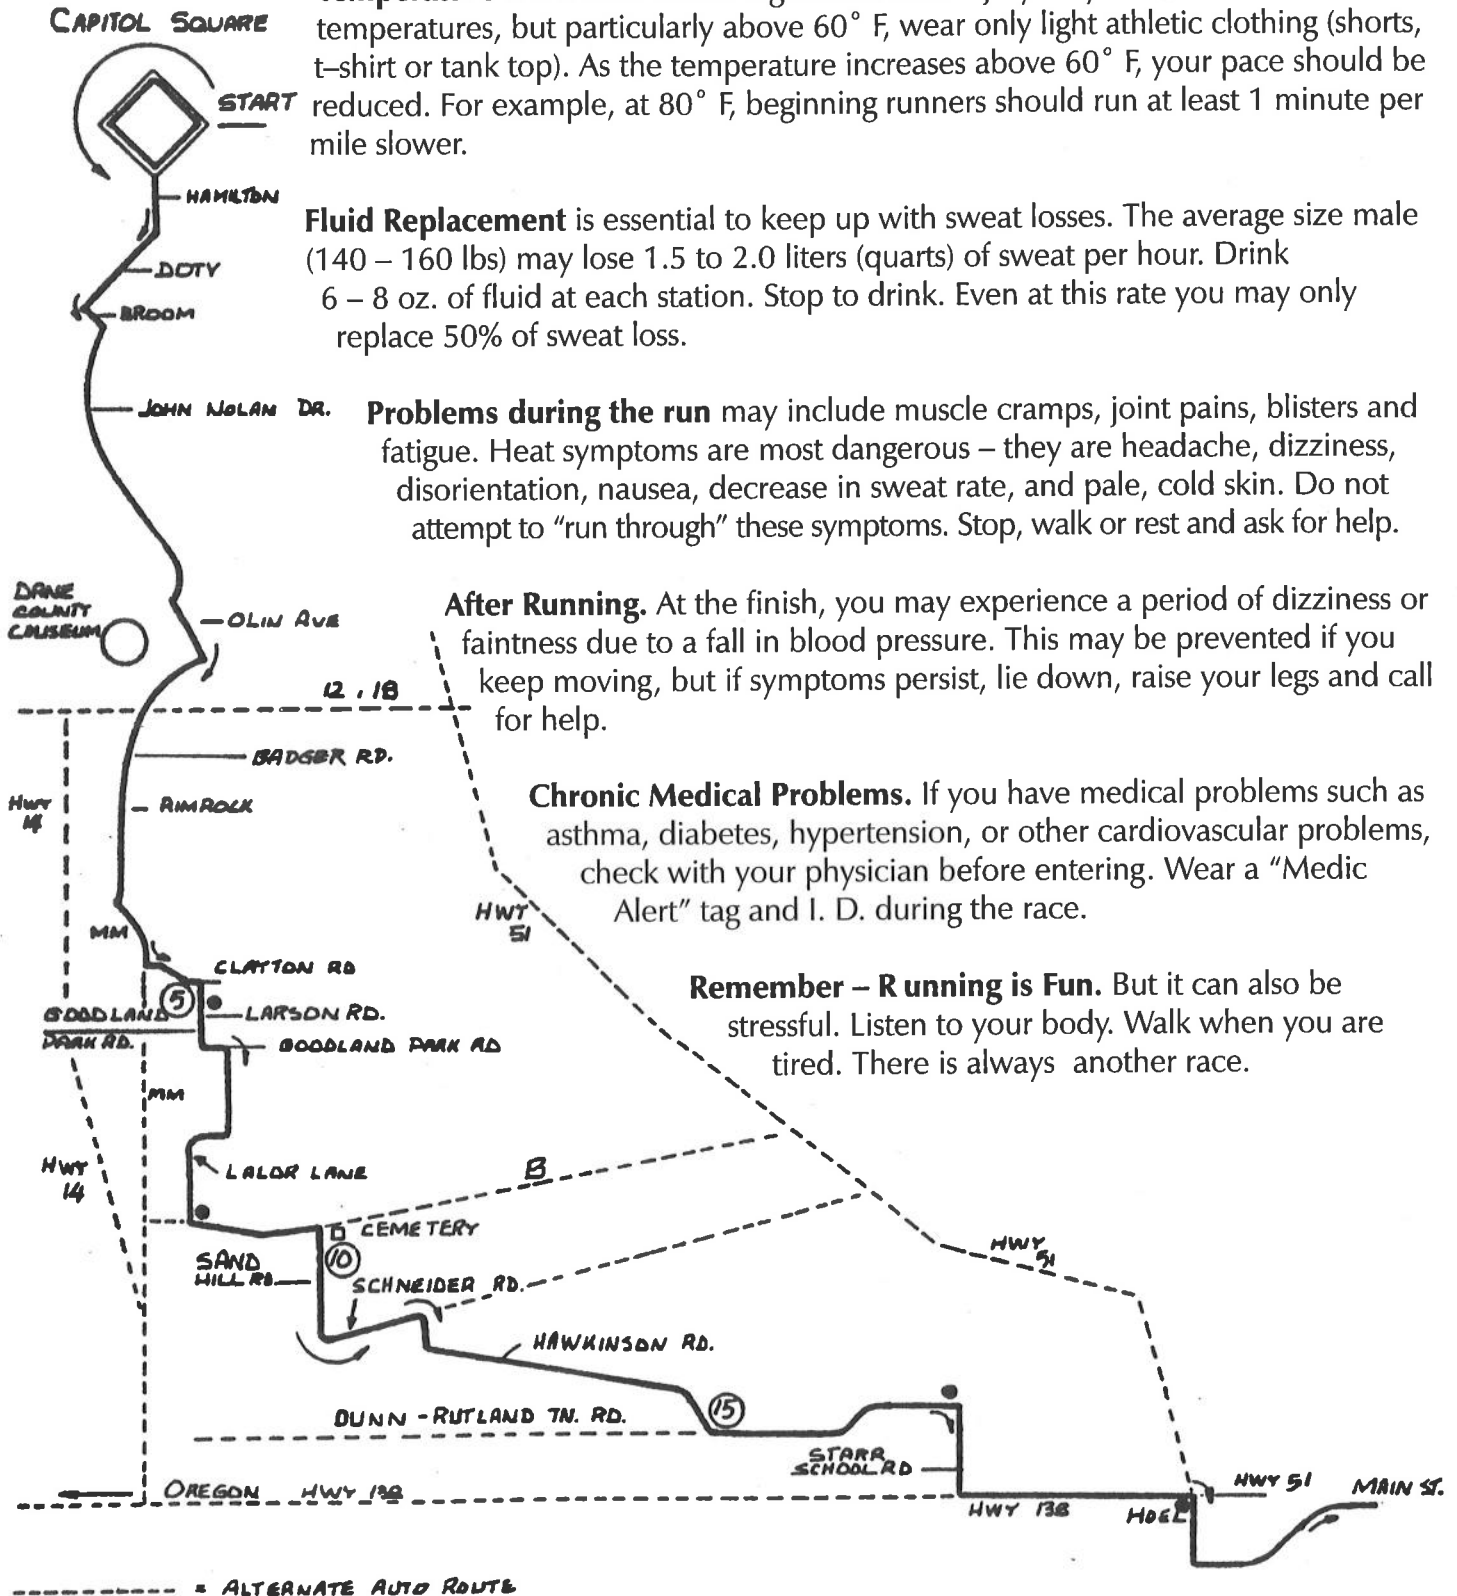

Fluid Replacement is essential to keep up with sweat losses. The average size male (140 – 160 lbs) may lose 1.5 to 2.0 liters (quarts) of sweat per hour. Drink 6 – 8 oz. of fluid at each station. Stop to drink. Even at this rate you may only replace 50% of sweat loss.

Problems during the run may include muscle cramps, joint pains, blisters and fatigue. Heat symptoms are most dangerous – they are headache, dizziness, disorientation, nausea, decrease in sweat rate, and pale, cold skin. Do not attempt to “run through” these symptoms. Stop, walk or rest and ask for help.

After Running. At the finish, you may experience a period of dizziness or faintness due to a fall in blood pressure. This may be prevented if you keep moving, but if symptoms persist, lie down, raise your legs and call for help.

Chronic Medical Problems. If you have medical problems such as asthma, diabetes, hypertension, or other cardiovascular problems, check with your physician before entering. Wear a “Medic Alert” tag and I. D. during the race.

Remember – Running is Fun. But it can also be stressful. Listen to your body. Walk when you are tired. There is always another race.
