## Run

This year's race once again ran very smoothly, without all of last year's hassles of construction and problems with traffic on the course. We added a lot of volunteers and some extra Police Officers to help ensure that those problems would not reoccur. So the only real thing to be done in this years directors notes is to thank everyone who makes this race possible. We could never afford to pay all of the people who volunteer so much of their time for this race. So I just want everyone who does to know how much I appreciate everything you do. I also want to thank the many runners and walkers that make this a great event. Keep training and we look forward to seeing you again next year.

Thanks,  
Paul Miller

## Walk

Last year's walk featured great weather and a strong turnout by the walking community. The rolling start continues to be popular and allows walkers to finish in plenty of time to enjoy the Syttende Mai festivities. As always, walking no more than two abreast is appreciated by all and keeps the event safe. A special thanks to Tom Doyle and the Wisconsin Volksmarch Association for their help at the registration and start.

See you this May,  
Steve Swenson

# Medical Self-Care for Beginning Runners

**Training and Preparation:** You should be able to run at least 10 miles at 10-12 minutes per mile pace to finish this race. If you eat before the race, eat a light breakfast at least 3 hours before starting time. Drink about 8 oz. of fluid one hour before. Start warming up (stretching and jogging) about 30 minutes before the run.

**Temperature** is a critical factor. Significant heat injury may occur at all temperatures, but particularly above 60° F, wear only light athletic clothing (shorts, t-shirt or tank top). As the temperature increases above 60° F, your pace should be reduced. For example, at 80° F, beginning runners should run at least 1 minute per mile slower.

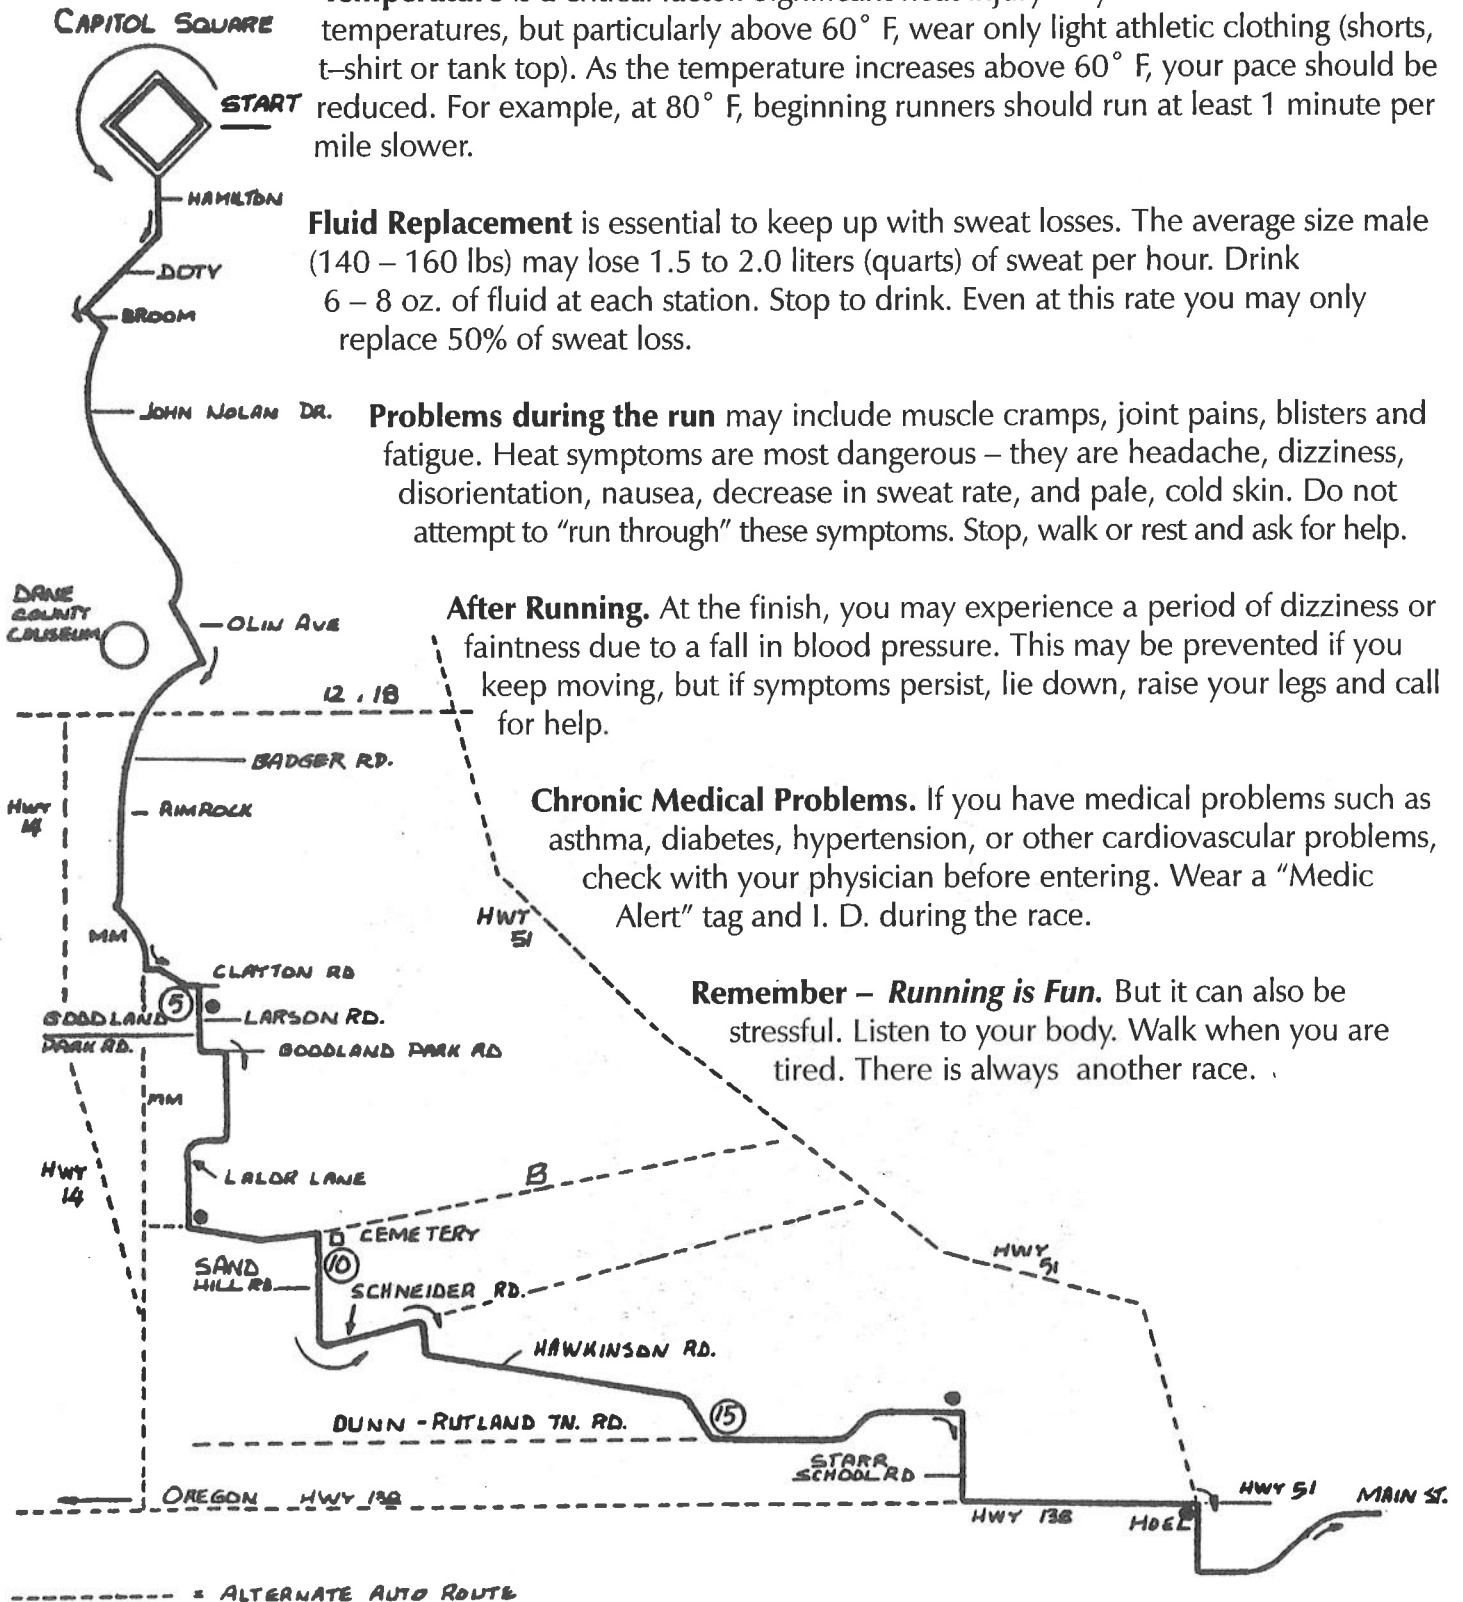

**Fluid Replacement** is essential to keep up with sweat losses. The average size male (140 – 160 lbs) may lose 1.5 to 2.0 liters (quarts) of sweat per hour. Drink 6 – 8 oz. of fluid at each station. Stop to drink. Even at this rate you may only replace 50% of sweat loss.

**Problems during the run** may include muscle cramps, joint pains, blisters and fatigue. Heat symptoms are most dangerous – they are headache, dizziness, disorientation, nausea, decrease in sweat rate, and pale, cold skin. Do not attempt to “run through” these symptoms. Stop, walk or rest and ask for help.

**After Running.** At the finish, you may experience a period of dizziness or faintness due to a fall in blood pressure. This may be prevented if you keep moving, but if symptoms persist, lie down, raise your legs and call for help.

**Chronic Medical Problems.** If you have medical problems such as asthma, diabetes, hypertension, or other cardiovascular problems, check with your physician before entering. Wear a “Medic Alert” tag and I. D. during the race.

**Remember – Running is Fun.** But it can also be stressful. Listen to your body. Walk when you are tired. There is always another race.
